

DuPont™ Cyrel® EASY FAST EFM

Built-In Flat Top Dot, High Ink Transfer Digital Plate

DuPont™ Cyrel® EASY FAST EFM

Cyrel® EASY with Built-In Flat Top Dot

[DuPont Advanced Printing](#) brings together leading technologies and products for the printing and package printing industries. [DuPont™ Cyrel®](#) is one of the world's leading flexographic platemaking systems in digital and conventional formats, including DuPont™ Cyrel® brand photopolymer plates ([analogue and digital](#)), [Cyrel® platemaking equipment](#), [Cyrel® round sleeves](#), Cyrel® plate mounting systems and the revolutionary [Cyrel® FAST thermal system](#).

DuPont™ Cyrel® EASY Plates: Color complexity, workflow simplicity.

DuPont™ Cyrel® EASY FAST EFM is the medium durometer, built-in flat top dot, thermal processed plate designed for paper substrate printing with excellent ink transfer capability on both coated and uncoated paper. Cyrel® EASY FAST EFM has a smooth surface which is ideally suited for the micro-screening of solids, exceptionally high solid ink density and low dot gain.

DuPont™ Cyrel® EASY FAST EFM

Applications

- Pre-print liner
- Carrier bags
- Beverage cartons
- Envelopes
- Folding cartons
- Tag and Label
- Flexible packaging

Product Features

- Medium durometer built-in flat top dot plate
- Vastly improved printing durability and consistency
- Excellent ink transfer permits improved ink laydown in solids and reduced mottling
- Wide substrate printing latitude to allow delivery of high quality printing on both coated and uncoated paper

- High exposure resolution that yields better quality reproduction
- Exceptional exposure latitude
- Excellent thickness uniformity
- Less make ready time

Printing Ink and Solvent Compatibility

Cyrel® EASY FAST EFM offers excellent compatibility with water-based, solvent-based and UV inks.

Platemaking

The Cyrel® FAST thermal developer allows the production of Cyrel® FAST finished plate in less than one hour, making it the ideal just-in-time platemaking system for a market that demands quick turnaround at the highest possible quality. The Cyrel® FAST thermal developer delivers outstanding plate quality and uniformity. This processor has the ability to produce a finished plate without solvent washout. The Cyrel® ECLF for exposing and light finishing plate is available to complement the Cyrel® FAST thermal developer.

DuPont™ Cyrel® EASY FAST EFM

Built-In Flat Top Dot, High Ink Transfer Digital Plate

Process of Use

DuPont™ Cyrel® EASY FAST EFM is designed to work with Cyrel® FAST thermal platemaking. Expose the plate through the back to establish the floor and maximize sensitivity. Back exposure varies according to relief required. Remove the protective coversheet and image the plate with the Cyrel® Digital Imager (CDI). Expose the front of the plate surface. Process the plate in the Cyrel® FAST thermal developer. Finish the plate in a light finisher to eliminate surface tackiness. Post-expose the plate to ensure complete polymerization.

Mounting

Cyrel® Microflex mounting devices are recommended for mounting Cyrel® EASY FAST EFM plates. The double sided adhesive should first be applied to the cylinder or sleeve – not the plate – to ensure easier and precise laydown. The polyester base will maintain accurate register even with large plates.

Storage – Raw Material

Store unexposed plates away from direct sources of heat (4-32° C, 40-90° F). Humidity control is not required. Cyrel® EASY FAST EFM is foam interleaved to provide maximum protection of the plate after manufacture and during transportation and storage. Plates should be stacked flat. Plates should not be exposed to sunlight or non-filtered white light. Continuous exposure to very high ozone concentrations should be avoided.

Handling – Raw Material

Like all photopolymer plates, Cyrel® EASY FAST EFM plates should be handled under UV free light; e.g., fluorescent tubes covered with amber sleeves.

Storage – Finished Plates

After printing, plates should be thoroughly cleaned with compatible solvent before storing. They may be stored on cylinders, sleeves or demounted and stored flat. Plates should not be exposed to sunlight or non-filtered white light. Detailed guidelines for handling and storage are available through your sales representative.

Technical Data	Cyrel® EASY FAST EFM 45 Thickness 0.045 inch/1.14 mm	Cyrel® EASY FAST EFM 67 Thickness 0.067 inch/1.70 mm	Cyrel® EASY FAST EFM 100 Thickness 0.10 inch/2.54 mm	Cyrel® EASY FAST EFM 112 Thickness 0.112 inch/2.84 mm
