FEATURES & PRODUCT DETAILS

DuPont™ Tyvek® 200 EasySafe. Hooded coverall available in white, sizes SM to 3X. Robust yet lightweight (<180g per garment). 2-piece hood. Elasticated face, wrists, waist and ankles.
Tyvek® 200 fabric is a new and unique optimised polyethylene nonwoven from DuPont. It is softer and with a more open structure than Tyvek® 500/600. It is therefore less protective than Tyvek® 500/Tyvek® 600, but offers adequate Type 5 and 6 barrier protection and remains both air and moisture vapour permeable.Tyvek® 200 Easysafe applications include remediation and industrial cleaning and general manufacturing.

- Certified according to Regulation (EU) 2016/425.
- Chemical protective clothing, Category III, Type 5 and 6.
- EN 1073-2 (protection against radioactive contamination)
- Antistatic treatment (EN 1149-5) – on inside and outside
- Stitched external seams in yellow for visual identification and differentiation
- Soft touch fabric for wearer comfort
- Optimised design and packaging

ADDITIONAL EQUIPMENT NEEDED

- Please read, understand and follow the Instructions For Use
- Wear other appropriate PPE such as, but not limited to, respiratory, eye, head, hand, and foot protection based on the hazard assessment.

COMFORT

The comfort of a protective garment during use is largely determined by its weight, its permeability to vapour and air (breathability) and insulating properties. Data on these attributes is provided according to test method and, as with other data, can be compared by garment.

Property	Test Method	Typical Result	EN
Air Permeability (Gurley method)	TAPPI T460	26 s	N/A

PENETRATION AND REPELLENCY

A specific test method, EN ISO 6530, is used to measure the indexes of penetration, absorption and repellency of protective clothing material exposed to liquid chemicals. Results listed here reflect the penetration resistance and repellency of DuPont fabrics to 30% sulphuric acid and 10% sodium hydroxide.

Property	Test Method	Typical Result	EN
Repellency to Liquids, Sodium Hydroxide (10%)	EN ISO 6530	>95 %	3/3 [1]
Repellency to Liquids, Sulphuric Acid (30%)	EN ISO 6530	>90 %	2/3 [1]
